TC 1700 MAIL ROOM

In response to the Brief on Appeal filed May 3, 2000, and further in view of the Advisory
Action dated June 1, 2000, please amend the above-identified application as follows:

IN THE CLAIMS:

Please amend the claims as follows:

- C
1. (Twice Amended) In a pneumatic radial tire for all-season passenger car comprising; a tread with a tread pattern defined by dividing the tread into many blocks through a plurality of slant grooves arranged at given intervals in a circumferential direction of the tire and at least one circumferential center groove extending in the circumferential direction of the tire at a center portion of the pattern, and consisting of a central zone having a width corresponding to 30-60% of a tread width and a pair of side zones located on both sides of the central zone; wherein
